CONTENTS

Volume 1, Issue Nos 1–6

COMMUNICATIONS IN APPLIED NUMERICAL METHODS

Issue No. 1, January—February 1985

Editorial 1

Iterative Solution of Mixed Problems and the Stress Recovery Procedures: O.C. Zienkiewicz, L. Xi-Kui and S. Nakazawa 3

A Fortran Subroutine for the Solution of Periodic Block–Tridiagonal Systems: M. Napolitano 11

Use of Modified Bisection Algorithm for the Vibrating Beam Problem: D.J. Evans 17

Ritz Finite Element Approach to Nonlinear Vibrations of a Timoshenko Beam: B.S. Sarma and T.K. Varadan 23

Computable Error Bounds for the Generalized Symmetric Eigenproblem: H. G. Matthies .. 33

Direct Determination of Finite Element Local Smoothing Matrices: C.E. Majorana, S. A. Odorizzi and R. Vitaliani 39

Cubic *B*-spline Product Integration Formulae Which Only Require Values of the Product Function at the Spline Knots: B. A. Lewis 45

Announcements 51

Issue No. 2, March—April 1985

A Partitioned Solution Procedure for Geothermal Reservoir Analysis: B.A. Schrefler 53

Exponential Upwinding and Integrating Factors for Symmetrization:: G.F. Carey 57

The Condensation of the Boundary Element Stiffness Matrix in FEBEM Analysis: K.G. Sharma, A. Varadarajan and R.B. Singh 61

A Condition for Simplifying the Forcing Term in Boundary Element Solutions of the Diffusion Equation: S. Sharp 67

The Implementation of Boundary Conditions of the Type u Equals Unknown Constant in Finite Element Codes: A. Segal 71

Treatment of Singular Integrals in the Boundary Integral Equation Method for Axisymmetric Elastostatics Problems: A.A. Bakr and R.T. Fenner 81

An Explicit Formula for the Generalized Hermitian Interpolation Problem: A.M. El-Zafrany *and R.A. Cookson* 85

Announcements 93

Issue No. 3, May—June 1985

On Upwind Collocation Methods: B. M. Herbst 97

Multiple Boundary Conditions, Free Surface Flow and the Boundary Element Method: J. A. Liggett 105

A Note on the Imposition of Traction Boundary Conditions When Using the FEM for Solving Incompressible Flow Problems: C. Taylor, J. Rance and J. O. Medwell 113

A Note on Marguerre Shell Finite Elements: G. Prathap, S. R. Pillai and H. Eggers 123

The Extrapolation of Implicit Methods for the Constant Coefficient Diffusion–Convection Equation: E. H. Twizell..... 129

Extraction Methods for Second Derivatives in Finite Element Approximations of Linear Elasticity Problems: L. Demkowicz and J. T. Oden 137

Issue No. 4, July–August 1985

A Simple Extension to Multidimensional Problems of the Artificial Viscosity due to Lapidus: R. Löhner, K. Morgan and J. Peraire 141

Dynamic Plane Stress Computations for Large Plastic Deformations: G. R. Johnson 149

Mass Balance in Shallow Water Simulations: D. R. Lynch 153

A Flat Triangular Shell Element with Improved Membrane Interpolation: N. Carpenter, H. Stolarski and T. Belytschko 161

Finite Deformations of a Viscoelastic Roll Cover Contacting a Rigid Plane Surface: C. N. Bapat and R. C. Batra 169

Extension of a Numerical Streamline Method: C. E. Pearson 177

Exact Expression for a Two-dimensional Finite-part Integral Appearing during the Numerical Solution of Crack Problems in Three-dimensional Elasticity: N. I. Ioakimidis 183

Announcement 191

Issue No. 5, September—October 1985

Three-dimensional Solutions to the Euler Equations with One Million Grid Points: A. Rizzi 193

A Note on Tangent Stiffness for Fully Nonlinear Contact Problems: P. Wriggers and J. C. Simo 199

A Generalization of Uzawa's Algorithm for the Solution of the Navier–Stokes Equations: M. Fortin and A. Fortin 205

A Note on the Numerical Solution of the von Karman Small Disturbance Equation: M. S. Pilant 209

A Simple Substructuring Procedure for Finite Element Analysis of Stress Concentrations: M. Kondo and G. B. Sinclair 215

Penalty Method Constraints for Mesh Grading in Two-dimensional Elasticity: G. P. Steven 219

Coupled Problems—a Simple Time-stepping Procedure: O. C. Zienkiewicz and R. L. Taylor 233

Symmetrization of the Contained Compressible-fluid Vibration Eigenproblem: C. A. Felippa 241

On the Accurate Determination of Stress Derivatives: A. M. Baudron, J. L. Marcelin and P. Trompette 249

Shape Effect on Morley's Element: H. Abdalla and K. Hassan 255

BOOK REVIEWS 261

ANNOUNCEMENT 262

CONFERENCE DIARY 262

Issue No. 6, November—December 1985

Block Diagonal Scaling for Iterative Methods in Thermal Simulation: J. C. Díaz, W. R. Jines, A. E. McDonald and T. Steihaug 263

A Singly-iterative Second-order Method of Characteristics for Unsteady Compressible One-dimensional Flows: R. Flatt 269

Finite Element Simulation of Flows of Fluids with Integral Constitutive Equations: D. S. Malkus 275

Numerical Solution of Regular and Singular Biharmonic Problems with the Tau Lines Method: A. E. M. El Misiery and E. L. Ortiz 281

Finding Polynomial Roots: a Fast Algorithm Convergent on the Complex Plane: A. V. Ivanisov and V. K. Polishchuk 287

A Minimum Configuration *L*-stable Fourth-order Non-autonomous Rosenbrock Method for Stiff Differential Equations: J. D. Day 293

The Expressions of Elasto-plastic Matrices Based on the Deformation Theory of Plasticity: J-F. He 299

New Symmetric Finite Difference Methods for Computing Eigenvalues of a Boundary-value Problem: R. A. Usmani and R. P. Agarwal 305

Explicit Formulation for the A-9 Triangular Plate Bending Element: C. Jeyachandrabose and J. Kirkhope 311

A Finite Element Approximation of the Benard Problem: R. Krishnan 317

Analysis of Tubular Joint with Weld Toe Crack by Finite Element Methods: G. S. Bhuyan, M. Arockiasamy and K. Munaswamy 325

Defectiveness of Weighting Method in Multicriterion Optimization of Structures: J. Koski 333

Preprocessor for the Generation of Mathematical Software: M. A. Aladjem and M. D. Mikhailov 339
